PROFESSIONAL SUMMARY

Python Developer with experience in building scalable systems and optimizing workflows, skilled in both frontend and backend development as well as database design and management. Proficient in developing efficient, maintainable, and high-performance applications, with strong problem-solving abilities and a focus on writing clean, reliable code. Delivered reliable and user-focused software solutions that improved system efficiency, streamlined business processes, and enhanced overall application performance.

WORK EXPERIENCE

Qspiders, Software Developer Intern:

05/02/2026 – 09/05/2026 | Bangalore

- Developed a food ordering application integrated with a voice assistant during an internship at QSpiders, while gaining hands-on experience in SQL, Python, and modern web technologies.
- Contributed as a frontend team member by designing responsive and intuitive user interfaces, improving usability, and ensuring seamless navigation across the application.

EDUCATION

Government Engineering College Haveri

2022 – 2026 | Karnataka, India

Bachelor of Engineering (B.E.) – COMPUTER SCIENCE

CGPA: 8.82/ 10

MRM COLLEGE HAVERI, Pre-University Course (PUC)

2020 – 2022 | Karnataka, India

Percentage: 89.5 / 100

TECHNICAL SKILLS

Programming & Scripting (Python, HTML/CSS, JavaScript)

Databases (Oracle SQL)

Developer Tools (VS Code, MySQL, Github)

Domain (Software Development)

Soft Skills (Leadership, Team Management, Problem-Solving, Communication)

PROJECTS

QR CODE BASED VEHICLE DOCUMENT VERIFICATION ANDROID APPLICATION

- Developed a digital vehicle document verification solution using QR technology for efficient and tamper-resistant record validation.
- Engineered seamless QR code encoding and decoding features to ensure instant access to authenticated vehicle data and a user-friendly experience.
- Designed a reliable server-side system with optimized validation logic and fault-tolerant error handling, boosting operational efficiency and system dependability.

ONLINE SHOPPING SYSTEM

- Engineered a scalable e-commerce application with integrated product exploration, shopping cart management, and streamlined checkout capabilities for efficient online purchasing.
- Implemented protected authentication workflows and interactive product navigation features, including keyword-based discovery, sorting options, and organized category access.
- Built responsive frontend components and optimized server-side services with secure database integration to manage customer accounts, inventory details, and order transactions reliably.

CERTIFICATIONS & ACHIEVEMENTS

Full Stack Development Internship - Navodita Infotech (1st Aug 2025 - 31st Aug 2025) |

Python Full Stack Development - Qspiders (5th Feb 2026 – 10th May 2026) |
